PROFILE

I am a full stack web developer, with experience in furniture design. As a maker, I have drafted blueprints and implemented manufacturing processes from start to finish, while maintaining the efficiency and versatility demanded by the project at hand. I believe this unique skill-set partnered with the combination of my creativity, detail orientation, and years of customer service will result in great success within full stack development. Through these experiences I have developed a passion to create clean and responsive user-experiences.

EXPERIENCE

2015 - PRESENT
DRVO FURNITURE
OWNER | OPERATOR
