PROFILE

I am a full stack web developer, with experience in furniture design. As a craftsmen, I have drafted blueprints and implemented manufacturing processes from start to finish, while maintaining the efficiency and versatility demanded by the project at hand. I believe this unique skill-set partnered with the combination of my creativity, detail orientation, and years of customer service will result in great success within the software industry.

PROFESSIONAL EXPERIENCE

1/2018 - 7/2018

UNIVERSITY OF KANSAS FULL STACK PROGRAM
STUDENT

- Developed PupLife - A full stack application that allows dog owners to schedule playdates. Features include authentication implemented with passport.js, MySQL Database, and an interactive search. Built utilizing these technologies: MySQL, React, Node.js, Express, and ChatKit.
